I enjoy working with people to solve problems and deliver excellence. Currently I build and maintain access control and security camera systems and the supporting server infrastructure for a dozen corporate locations as part of the Identity and Access Management team. I am looking for an opportunity to take mission-critical operations experience and grow into a DevOps role.

Recent Projects

- Selected Zoom based on user trials and deployed to hundreds of conference rooms in 14 sites in 3 months
- Contributed to IT Operations Standards documentation for M&A transitions
- Submitted PCI and ISO27001 certification controls for access control and security camera recordings
- Selected new security camera server system and transitioned all sites and cameras

Extracurricular

- Beekeeping, Gardening, Color Film Processing, Cycling, Time-Lapse Photography and K30 Crew Cab Maintenance
- Mac, Linux, Python

Employment

2016 - Present

Red Ventures - AV Operations Tech (2016)

- Deployed room use scheduling panels for 225 conference rooms
- Supported hundreds of video conference rooms and thousands of users
- AV and Access Support Engineer (2019)
- Worked closely with vendors and other teams to bring new office locations online
- Maintained passwords and firmware on hundreds of security cameras in many locations
- Coordinated with developers and vendors to maintain functionality of API-dependent tools through upgrades

2011 - 2016

SKC - Provided technical customer service to maintain and repair audiovisual videoconferencing and telecom systems, including endpoints, infrastructure, video distribution and control system hardware as an Integration Support Technician. Provided executive support for Duke Energy and Novant Health
